
DRAFTOSAURUS
AERIAL SHOW
RULES

COMPONENTS

- 10 **Pterodactyl** meeples
- 5 double-sided **Aviary** boards

SETUP

Each player gets an **Aviary** board that they put above their **Zoo** board.

Choose one side for the game (all players use the same side).

After putting the number of dinosaurs indicated in the base game rules for the number of players into the draw bag, each player draws 2 dinosaurs. They each put one lying down on each of the "Egg" ( ) spaces on their **Aviary** board. Finally, add 2 **Pterodactyls** per player to the draw bag (even in a two-player game).

PLAYING PTERODACTYLS

A new species of dinosaur has arrived: **Pterodactyles**. These dinosaurs can only be placed in the mountain zones on the new **Aviary** boards. After setup is complete, the mountains cannot receive any other types of dinosaurs. When players place **Pterodactyls**, they ignore requirements from the placement die.

Each player's first **Pterodactyl** can only be placed on a space on their first mountain ( ). Once a **Pterodactyl** has been placed on a mountain, the next mountain (connected to it by a hanging bridge) becomes available and can now receive **Pterodactyls**.

*Note: Like all dinosaurs, **Pterodactyls** can be placed in the River on the **Zoo** board.*

Whenever a **Pterodactyl** is placed, it triggers an effect.

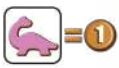
Take the dinosaur placed on this Egg and put it in the Pen of your choice or in the River. The placement die requirement does not apply to this dinosaur.

Before counting victory points at the end of the game, put all the dinosaurs that are still on Eggs back in the box. They do not provide any victory points.

At the end of the game, get the indicated number of victory points.

Placement die requirements no longer apply to you until the end of the game.

At the end of the game, earn 3 victory points per **Pterodactyl** in the **Zoo** belonging to the player on your left.



At the end of the game, earn 1 additional victory point for each Pen in your Zoo **that contains (at least) one of this species of dinosaur.**

PLAYING WITH BOTH EXPANSIONS

Do the setup for Aerial Show followed by the setup for Marina. During the game, each player draws and places 7 dinosaurs per round. In two-player games, during the first two rounds, the players each draw 8 dinosaurs and place 4 in their Zoos. In the following two rounds, each player draws 6 dinosaurs and places 3 in their Zoo.
